

Academic Program for Master Degree Candidates in Electrical Engineering

Program overview

This program will ensure that students become experts in the field of Electrical Engineering. The first year is almost entirely devoted to expanding one's knowledge of the field. In the second year, the courses are mainly focused on research methodologies and the topic for the dissertation is chosen and the associated research plan is written. In the third year, students will finish their dissertations and after defending, they will be awarded the title of M.eng.

Aim of the program

The aim of the program is to educate the next generation of Electrical Engineering talent to be able to compete with their peers in the global job market. Through extensive training and research practise, students will graduate and hold the Master's degree enabling him or her to work in the energy industry, electronics industry, consultancy industry.
