

Academic Program for Master Degree Candidates in Optical Engineering

Program overview

This program will ensure that students become experts in the field of Optical Engineering. The first year is almost entirely devoted to expanding one's knowledge of the field. The second-year focuses on deepening the understanding of the field and the topic for the dissertation is chosen and the associated research plan is written. In the third year, students will finish their dissertations and after defending, they will be awarded the title of Master of Engineering.

Aim of the program

The program aims to educate the next generation of Optical engineering talent that is able to compete with their peers in the global job market. Through extensive training and research practise, the student will graduate and hold the Master's degree enabling him/her to work in the fields including (but not limited to) advanced laser technology and application, optical communication devices and sensing technology, information optics, and optoelectronic materials and devices.

When and how to apply

Applicants can apply starting from December 20th, 2021 till May 31st, 2022. For more information on the documents needed and the application procedure, please visit: <http://www.istudy.sdu.edu.cn>.

Application for financial support

There are possibilities for getting a scholarship either by the China Scholarship Council (CSC), the local government or through Shandong University. For more information on CSC scholarships, please visit: <http://www.campuschina.org/>. For more information on local government or university scholarships, please visit: <http://www.istudy.sdu.edu.cn>.

Contact information (for questions regarding the program or school)

Address: School of Information Science and Engineering, No. 72 Binhai Road, Jimo District, Qingdao, P.R. China; Postal Code: 266237.
