

Academic Program for Master Degree Candidates in Human Anatomy and Histoembryology

Program overview

This program will ensure that students become experts in the field of Human Anatomy and Histoembryology. The first year is almost entirely devoted to expanding one's knowledge of the field. The second-year focuses on deepening the understanding of the field and the topic for the dissertation is chosen and the associated research plan is written. In the third year, students will finish their dissertations and after defending, they will be awarded the title of Master of Medicine degree majored in Human Anatomy and Histoembryology.

Aim of the program

The program aims to educate the next generation of Human Anatomy and Histoembryology talent to be able to compete with their peers in the global job market. Through extensive training and research practise, the student will graduate and hold the Master's degree enabling him or her to work as a lecturer or do clinical work related to sectional and imaging anatomy.
